

**FOR SAFE HANDLING OF LIQUEFIED PETROLEUM GAS (LPG)**

- Purchase your LPG and PSB-approved accessories from authorised dealers.
- Ensure that your LPG dealer conducts the 5-point safety check of (includes the hose, regulator, hose clips, cylinder and joints/connections) on your LPG system at least once a year.
- Always keep gas cylinders upright; never store them horizontally.
- Keep the gas cylinder away from open flames, heat sources and electrical outlets.
- Ensure that there are no naked flames nearby when changing the gas cylinder
- Store no more than one spare cylinder at any time, and the spare should be kept upright in a ventilated cabinet.
- Keep windows open and the kitchen well ventilated while cooking; never leave cooking unattended or place flammable items near the flame.
- Turn off the gas supply at the regulator before leaving for overseas trips.
- Replace the gas tubing/hoses upon the expiry dates marked on the tubing/hose and replace the regulators every 5 years.
- If you fail to ignite the stove after switching on the gas valve, it is advisable to turn off the gas valve and open all the doors and windows to ventilate the kitchen for a while before trying to ignite again. This will prevent ignition of the flammable LPG cloud that is surrounding you.
